- Kind of Battery: Rechargeable
- Mains power: AC 220-240V - 50Hz
- Number of batteries: 1 battery-pack per handset
- Standby time: Up to 130 hours
- Talk time: Up to 10 hours

Product highlights

Speakerphone - Talk handsfree
Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

Very low energy consumption
Thanks to a high efficiency power supply, the overall energy consumption is reduced by more than 50% compared to a conventional power supply.

Automatic power reduction
Thanks to an intelligent embedded system, the transmitted power is permanently controlled and optimized depending on the distance between handset and base unit.
